

Plan for League to Handle Credits Is Heard at Brussels

Financial Congress Names Committee to Consider Various Schemes to Handle International Business

BRUSSELS, Oct. 2 (By The Associated Press).—Consideration of another world-credit scheme occupied the International Financial Conference this morning. It was presented by Dr. Ter-Moulen, a delegate from Holland. His proposal was that the question of international credit be handed over to the League of Nations, which would appoint a central committee on commercial credits.

The countries desiring to use the facilities of this committee would communicate to it the nature and extent of the securities they would pledge for credits to importers. If the securities were approved the central body would fix the amount of credit to be given and the League of Nations would issue interest-bearing bonds to the amount of the credit furnished.

These bonds could be used as collateral security either at the bank of the purchaser or by direct transmission to the creditors in payment for his purchases.

The only difference between this scheme and the one presented yesterday by Dr. Delacroix of Belgium is that this later plan comprises revenues from taxes among the things that may be pledged.

Brazilian Makes Proposal

Dr. Barbosa Carneiro, Brazilian delegate, and Alberto Brancas, of Argentina, proposed to the conference the organization of an international financial institute. This body would act as a permanent under the auspices of the League of Nations and make recommendations regarding the action to be taken by the league respecting the financial policy or condition of any nation that might threaten an international financial crisis.

The institute would also study the finances and economies of the world generally and distribute information of interest to all countries.

The critical and decisive phase of the conference began this afternoon when the last speakers were heard in one session and President Ador recommended the question of international credits to a special committee. This committee comprises Colonel Ralph H. Hoag, United States; M. Averon, France; Henry Bell, Great Britain; Julio Barbosa Carneiro, Brazil; Alberto Brancas, Argentina; Dr. Alfonso Costa, Portugal; Marquis De Cortina, Spain; and Herr Ullrich, Germany. The committee convened immediately.

Hope for Workable Scheme

A number of the delegates informed The Associated Press they believed the committee would recommend some workable system of international credits. Some were in favor of the De la Croix plan, others the proposal presented by Dr. Ter-Moulen, while a few reject both as involving a new, complicated and expensive organization, which would be likely to encounter the hostility of banks.

They consider that it is possible to use the present banking systems of the different countries in an international system at less cost and trouble to accomplish the same purpose. The delegates were non-committal regarding the work of the committee, as they had been adjured to keep the deliberations absolutely secret.

M. Hoer, of the Federal Economic Department of Switzerland, was the last speaker on international credits. He suggested an inquiry into the results in the United States and France of experiments in institutions to facilitate exportation.

M. Averon, France, expressed satisfaction at the harmonious and effective work of the delegates. He said that gold no longer played its part in international exchange, and something must be set up to replace it. That substitute must not be as a distribution for charity, but for needed credits for sane, solid enterprises.

Alberto Brancas, Argentina, spoke at length in the same vein.

Scores of Lives Lost In Japanese Typhoon

120 Injured and Heavy Property Damage Caused by Storm Around Yokohama

TOKIO, Oct. 2 (By The Associated Press).—Scores of persons have lost their lives and widespread property damage has been done by a typhoon which struck the eastern coast of Japan yesterday. The storm centered around Yokohama, where forty-four Japanese were drowned or killed by falling walls and 120 were seriously injured. Seventy-three houses were destroyed, forty-eight damaged and 6,000 flooded. A score of fishing boats foundered in the harbor and nine men were drowned. Residents in the foreign quarter, on the hill above the city, escaped uninjured.

Thousands of houses were flooded in Tokyo and five persons were killed during the progress of the storm. Reports from the provinces say that many have been drowned, sixteen having perished in a village in the prefecture of Ibaragi. Railroad and wire communications have been interrupted.

British Capitalists Seek Control of German Ships

Plan Declared Only Temporary Measure for Fulfillment of Treaty of Versailles

From The Tribune's European Bureau. Copyright, 1920, New York Tribune Inc.

LONDON, Oct. 2.—Reports from Berlin that British capitalists are seeking to obtain control of all shipping in the Danube are confirmed here, with the explanation that this is only a temporary measure to be carried out in fulfillment of the terms of the treaty of Versailles. It is said that the Britons are trying to dominate not only the lines in Austria and eastward, but also those in Germany.

It is said that this control is necessary because neither Germany nor Austria is able to furnish the capital or the men to keep the traffic moving. It is said officially that the British have no intention of assuming permanent direction of the river shipping.

Suits \$30 in London; Tailored Overcoats \$22

Clothes Makers Say High Prices Have Passed Because Public Refused to Pay

From The Tribune's European Bureau. Copyright, 1920, New York Tribune Inc.

LONDON, Oct. 2.—Prices of men's suits are falling rapidly in London. Fashionable Saville Street tailors are cutting from \$15 to \$20 from the charges for the best winter suits and the average price for a suit for a well-dressed man this fall will be about \$30 or \$40.

"The end of the high priced suit has come," said one Bond Street tailor today. Another declared: "The tepoch in prices has been reached."

Overcoats are being offered by some shops at \$22.50. Last year the price of men's suits ranged from \$22.50 to \$70, the highest in London's history. The drop this fall is attributed by clothiers to the refusal of the public to pay more.

Germany Will Oppose French Annexation Plan

Reichstag Interpellation Proposed Regarding Colonies of Togoland and Kamerun

BERLIN, Oct. 2.—Newspaper dispatches saying that France intended to annex the former German colonies of Togoland and Kamerun will be the subject of an interpellation in the Reichstag by the German Nationalists, according to a semi-official news agency, which says that such annexation would be in direct conflict with Article 22 of the peace treaty, and that Germany would never recognize the right of the French government to take such action.

The statement adds that the German government naturally leaves nothing undone to prevent an interpretation of the treaty which would justify France's alleged intention.

Japanese Propose Commission to U. S. To Better Relations

America-Japan Society Considers Sending Delegation to Discuss Proposed Alien Legislation by California

TOKIO, Oct. 2 (By The Associated Press).—The America-Japan Society has appointed a committee to consider possible steps to be taken to improve the relations of the two countries, and some idea prevails of dispatching a delegation to the United States. The executive council of the American associations of Tokyo, Yokohama and Kobe also are deliberating on the American question. Some officials in Japan favor sending a special commission of Japanese to the United States as soon as possible, although the position such a commission would be expected to have is vague and undefined.

The impression exists here that Japan is preparing to propose a joint high commission as a last resort, in the event of failure of the diplomatic pourparlers to find a solution of the California question.

Former Premier Okuma's recent condemnation of the indifference of public opinion with regard to grave questions affecting the nation's interests has been followed by official utterances calling attention to the necessity of maintaining cordial relations between the classes and of directing public thought so as not to harm the social order.

The spread of the new Shinto religion, Omotokyo, which popularly is supposed to preach socialistic and even anarchistic ideas, under the cloak of loyalty to the imperial house, is cited as dangerous to society and alarming to the military authorities because it is affecting many officers and men of the army, especially the reservists. The opposition politicians claim that, despite the fact that it is fortified by a majority in the House of Representatives, the Hara Cabinet is unpopular because of internal conditions, including uneasiness concerning the economic and financial situation and high prices growing out of unemployment.

French Labor Refuses Domination of Moscow

Majority Program Adopted by 1,478 to 602: Favors Supervision of Industries

ORLEANS, France, Oct. 2.—The French Federation of Labor to-day adopted a majority declaration of policy, by 1,478 votes against 602, for the minority resolution which declared for the Moscow Internationale and co-operation with the active revolutionary party.

The majority declaration reiterates the policy of "complete independence" for itself and other similar national organizations. It declares unreservedly that its revolutionary objects are "incompatible with present institutions and with capitalism and its political expressions."

It proposes immediate action for supervision of industry and commerce by the workers, to be sought by direct action; urges an intensive campaign for nationalization of essential industries and calls on the International Federation of Labor for united action to accomplish social transformation.

The declaration points out that "the revolutionary temper existing throughout the working world is most propitious for the agitation of such action." It approves the organization of the international labor bureau as designed, to spread unionism, promote legislation and furnish statistics. Sympathy and encouragement are expressed for the Italian workers, and indignation toward the French government, "the servile instrument of world reaction."

Spanish Parliament Dissolved

MADRID, Oct. 2.—King Alfonso today signed a decree ordering the immediate dissolution of Parliament.
